Recent Developments & Outlook

After two consecutive losing months, the MSCI Emerging Markets Index (ND) recovered nicely in June, advancing 3.4 % in local currencies, 3.8 % in US dollars and 1.4 % in euros. The MSCI EM Index (January 1988 = 100) now stands at \$ 1,657 and € 1,674, respectively. Year-to-date, the EM benchmark rose 5.6 % in local currencies, 4.9 % in US dollars and 2.6 % in euros. The euro gained 2.3 % versus the US dollar in June and now stands at 1.0910, up 2.2 % from its year-end 2022 level of 1.0673.

Seventeen markets advanced, six markets declined and one market—the Czech Republic—was unchanged last month. Turkey (+20.5 %), Peru (+11.1 %) and Brazil (+9.2 %) performed best, while Qatar, Malaysia (both down 0.8 %) and Egypt (-0.6 %) performed worst. Year-to-date, seventeen markets are up and seven markets are down. The biggest winners in the first six months are Greece (+40.2 %), Egypt (+25.0 %) and Taiwan (+21.5 %). Colombia (-16.8 %), Thailand (-7.6 %) and Malaysia (-6.4 %) performed worst. Due to the ongoing poor performance of their currency, Egypt’s and Turkey’s gains in local currency turned into losses year-to-date if performance is measured in euros. Performance is in local currencies unless mentioned otherwise.

In June, the **Emerging Markets Top Value Model Portfolio**, which is based on the **Top Value Strategy** (December 1988 = 100) using national MSCI country indices as hypothetical investment vehicles, advanced 4.2 % in local currencies, 6.0 % in US dollars and 3.6 % in euros. It now stands at \$ 34,987 and € 35,351. Year-to-date, it is up 8.1 % in local currencies, 11.4 % in US dollars and 9.0 % in euros. There was no change in our performance ratings last month: Our **Top Value Model Portfolio** continues to hold the eight “Buy”-rated markets Brazil, Chile, China, Korea, Malaysia, Mexico, Poland and Taiwan. According to our analyses, an equally weighted combination of these most attractively valued markets offers the highest expectation of long-term risk-adjusted performance. For the recent performance of the national and regional MSCI EM indices, benchmarks and strategies please see page 6.

The table below shows how the **Emerging Markets Top Value Model Portfolio** compares to three alternatives as of the end of June 2023 based on selected valuation and return measures:

	Valuation Ratios			Rates of Return (%)		
	PBV	PCF	PE	DY	CFRoE	RoE
EM Top Value Model Portfolio	1.39	6.3	10.0	5.25	22.1	13.9
MSCI Emerging Markets Index	1.63	9.1	13.6	3.26	17.8	12.0
MSCI World Index (DM)	3.00	13.6	20.3	2.00	22.1	14.8
MSCI EM Growth Index	3.06	13.0	20.7	1.65	23.6	14.8

According to our analyses, the asset class *Emerging Markets Equities* is now undervalued by 38 % compared to the MSCI World Index of the developed markets. Moreover, the **Emerging Markets Top Value Portfolio** is now undervalued by 27 % compared to the MSCI Emerging Markets (Standard) Index, by 55 % compared to the MSCI World Index of the developed markets (DM) and by 57 % compared to the MSCI EM Growth Index. This extreme undervaluation is not justified by the underlying fundamentals. Therefore the recent outperformance of the **Top Value Portfolio** is expected to continue over the next three to five years.

Michael Keppler
New York, July 3, 2023

P.S. Due to liquidity issues and geopolitical risks, we are deviating from straight equal weighting of markets in the portfolios we advise.
